EXAMINER'S COMMENT

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be **material to patentability** as defined in 37 CFR 1.56.

REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 3,785,252 to Cornair. The improvement comprises an attachment element for the selective bearing of a fluid operated power cylinder in a pivotal and/or fixed manner, with a base region, wherein the base region is designed with bearing means for any additional terminal interlocking bearing engagement with the power cylinder as may be required for the purposes of providing a variety of attachment possibilities to many power cylinders.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The patent to Cornair is cited for the showing of an attachment element similar to applicant's but lacking a base region designed with bearing means.

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of fourteen patents.

Albright, Thompson, Pirhadi, Bender, Nunnemacher et al., Matousek et al., Iijima et al., Williamson, Flick et al., Wagstoff, Wood et al., Naud, Wunsch, and Westinghouse are cited to attachment elements for power cylinders.
